Air pressure machine

In order to provide you the best and most efficient service together with our high quality domestic and foreign suppliers and successful craftsmanship work, we are in your production with the growing research development work to ensure the maximum performance and efficiency.

The compact compact screw compressors produced by our company are designed for minimum space occupancy with 3 hp to 20 hp and compact design. It is an ideal solution for companies suffering from space shortages. Normal screw compressors are no different from the principle of operation. Only the compressor and the dryer are mounted on a horizontal tank, saving space and reducing the pressure loss during air transfer to zero as the connection paths are short.
